

Enriching Multi-vendor Discovery Data with AssetXpert – January 21, 2026

The Netformx vendor knowledge base in [AssetXpert](#) continues to grow as partners share their scans and request data enrichment support. This enriched data enables more comprehensive network assessments—helping uncover refresh opportunities, identify vulnerabilities, validate AI readiness, and strengthen your position as a trusted advisor. It also aligns with Cisco’s evolving 360 strategy and can help unlock valuable incentive rewards.

Vendors we enrich data for today:

- Cisco (most comprehensive)
- Citrix
- Extreme Networks
- F5
- Infoblox
- Juniper
- Palo Alto Networks
- Dell
- Fortinet
- VMWare
- 3Com/H3C
- Arista
- HP
- Aruba

The Types of enrichment will vary:

- Serial Numbers (always)
- Product Numbers (varies)
- EOX (varies)
- FRUs (varies)
- Configuration (varies)
- CVE’s & CVSS (varies)
- Software status (varies)
- SmartNet Contracts & Subscriptions (Cisco Only)

If you come across vendors in your Discovery that need data enrichment, let us know. Your input helps strengthen the knowledge base for everyone.

We can enrich the data in just a few days—so you’ll quickly have what you need to enhance your reporting, improve customer conversations, and drive better outcomes for both you and your customer.

Simply contact support@netformx.com to get started.
