

Multivendor Discovery Data Enriched with AssetXpert (February 12, 2026)

Netformx [AssetXpert](#) delivers powerful multivendor network discovery with broad device coverage. If a network device supports standard protocols — at minimum SNMP — there are typically no vendor limitations on what can be discovered. AssetXpert uses these native protocols to quickly baseline heterogeneous environments.

Discovery is then enhanced by a continuously expanding vendor knowledgebase built from partner assessments and enrichment requests, transforming raw scan data into actionable network intelligence. This enables deeper assessments that uncover refresh opportunities, expose vulnerabilities, and validate AI readiness.

While multivendor enrichment is strong, Cisco devices receive the deepest lifecycle, security, and program alignment — supporting Cisco 360 execution, CPI optimization, and stronger PVI performance.

Vendors we enrich data for today:

- Cisco (most comprehensive)
- Citrix
- Extreme Networks
- F5
- Infoblox
- Juniper
- Palo Alto Networks
- Dell
- Fortinet
- VMWare
- 3Com/H3C
- Arista
- HP
- Aruba
- For the latest list: <https://www.netformx.com/faq/which-vendors-does-assetxpert-discover-and-enrich/>

The Types of enrichment will vary:

- Serial Numbers (always)
- Product Numbers (varies)
- End-of-Life, End-of-Support etc. — EOX (varies)
- Field Replaceable Units — FRUs (varies)
- Configuration (varies)
- CVE's & CVSS (varies)
- Software status (varies)
- SmartNet Contracts & Subscriptions (Cisco Only)

If your discoveries surface vendors or devices that need deeper enrichment, let us know — your submissions directly strengthen the AssetXpert knowledgebase and increase the value of every future assessment.

Our enrichment team can typically enhance and normalize vendor data within days, turning raw multivendor discovery into decision-grade network intelligence — so you can deliver stronger reports, sharper lifecycle insights, and more impactful customer conversations. The faster the enrichment, the faster you can uncover refresh, security, and modernization opportunities.

Contact support@netformx.com to submit vendors for enrichment and accelerate your next assessment outcome.
